

With the need for a reliable on-site shredding service, Kettering General Hospital contracted Box-it South Midlands for its scheduled fortnightly document destruction.

Kettering General Hospital NHS Foundation Trust provides a wide range of services to people across North Northamptonshire, South Leicestershire and into Rutland.

"Box-it is providing an exceptional service. Box-it personnel have been co-operative, friendly and accommodating to the needs of the Trust. They provide a top class service that doesn't require regular monitoring. I am looking forward to working closely with Box-it in the future"

Robin Packman,
Waste Project Manager
Kettering General Hospital
NHS Foundation Trust

The Northamptonshire hospital is finding the mobile shredding service provided by Box-it South Midlands to be extremely efficient and reliable. The previous supplier had not provided the standard of service required by the hospital and its management recognised the necessity for change.

Box-it South Midlands was pleased to win the contract for Kettering General Hospital's on-site shredding which is carried out on a scheduled fortnightly basis. The obsolete paperwork is collected in Box-it's shredding sacks fastened with bar-coded security ties by the hospital's porter service. They are then securely stored in an external storage unit provided by Box-it. The secure storage is located conveniently in order for the shred truck to attend site, where the paperwork is then destroyed under hospital supervision.

The Waste Management team at Kettering General Hospital has the peace of mind that its paperwork has been destroyed in extremely secure conditions, and is dealt with in line with correct procedure.

Key Features of Box-it's On-Site Confidential Destruction Service:

- Allows for client supervised document destruction
- Provides the convenience of on-site shredding
- Both scheduled visits and ad hoc collections can be arranged
- Secure consoles can be provided for confidential waste management
- Sacks with security ties are also available, or clients can use their own
- Shredding is recycled into new paper products
- BS EN 15713:2009 for Secure Destruction of Confidential Material
- Certificates of destruction issued at the end of the process
- Box-it only uses its own CRB checked personnel
- Eligibility to work
